EXPERIENCE

Frontend Developer (Associate Software Engineer)

April 2025 – Present

TravelMe

Noida, India

- Built reusable React.js components and dynamic itinerary pages for a travel booking platform.
- Integrated REST APIs for booking management, trip packages, and customer data enabling real-time frontend-backend synchronization.
- Optimized application performance through efficient state management and component restructuring, improving rendering efficiency and responsiveness.
- Collaborated in an Agile team with backend developers and UI/UX designers, contributing to debugging, testing, code reviews, and Git-based version control for faster feature delivery.

PROJECTS

InvoicePulse — AI-Powered Invoicing and Business Management Platform [GitHub](#) — [Live Demo](#)

- Built a full-stack AI-powered invoice management platform using MERN stack and Redux Toolkit, enabling automated invoice creation, secure billing workflows, and PDF-ready business documents.
- Integrated Google Gemini AI API to extract and structure 50+ invoice fields with retry mechanism (2 attempts, 1.5s backoff), achieving 90% data accuracy and reducing manual data entry effort.
- Designed a financial calculation engine handling GST, VAT, discounts, shipping charges, and item-level pricing with precise rounding logic for accurate billing computations.
- Developed optimized frontend architecture using Redux Toolkit with PDF generation (html2canvas, jsPDF) supporting multi-page A4 export and dashboard analytics.
- **Tech Stack:** JavaScript, React, Redux Toolkit, Moment.js, Tailwind, jsPDF, Node.js, MongoDB, GenAI, Nodemailer

Support IQ — AI-Powered SaaS Customer Support Tool

[GitHub](#) — [Live Demo](#)

- Built an AI-powered customer support chatbot leveraging Gemini (LLM), reducing manual query handling efforts.
- Implemented secure script embedding via dynamic `<script>` tag generation, enabling setup within 60 seconds.
- Improved user interaction by implementing smooth UI animations using Framer Motion.
- **Tech Stack:** TypeScript, Next.js, Node.js, Express.js, MongoDB, Scalekit, Framer Motion, OpenAI/Gemini API.

StyleNest — Full-Stack E-Commerce Platform

[GitHub](#) — [Live Demo](#)

- Built a secure e-commerce platform via Razorpay API and JWT-protected sessions.
- Admin Dashboard for real-time inventory with optimized React state management.
- Enhanced performance and user experience through efficient API handling and a responsive UI.
- **Tech Stack:** JavaScript, React.js, Redux, Node.js, Express.js, MongoDB, Razorpay, JWT.
